Work Experience

Senior Software Engineer – Justworks

New York, NY · Nov 2025 – Apr 2026

- Consolidated duplicate logic spread across two codebases in Go and Javascript into a single centralized service for all company creation in the Justworks Payroll platform, serving 200 businesses per month
- Built a backend integration with Greenhouse ATS that auto-populates new hire invitation forms
- Authored 10 articles documenting best coding standards, testing strategies, and new hire materials
- Wrote a Slack bot with Javascript to screen Slack messages for specific topics and notify subscribers

Software Engineer II – General Motors

Detroit, MI · Mar 2022 – Oct 2025

- Built a RESTful web application with Azure for camera software tools using React, Node.js, and Flask
- Automated camera target testing by training a YOLOv7 object detection model and connecting it to a gimbal, resulting in a sub-pixel accuracy of 0.1 and saving 16 hours of testing per camera
- Increased runtime efficiency of a now-patented modulation transfer function (MTF) algorithm by reducing expensive calculations, resulting in a 55% improvement
- Developed 6 image analysis tools in Python for evaluating properties such as noise and color accuracy
- Created Python GUI tools using Tkinter to improve usability of 3 different camera testing machines
- Designed a demosaicing algorithm to aid in evaluating the color difference of supplier image sensors
- Mentored 6 junior software engineers, supervising their work and career growth

DevOps Engineer – General Motors

Detroit, MI · Sep 2019 – Mar 2022

- Co-authored a Jenkins-based CI/CD pipeline in Groovy, managing 65 vehicle software components
- Utilized Git repository history to automate the generation of release letter content for Electronic Control Units, serving as official business records with 10 new records being generated daily
- Implemented a build error detection system that reports issues directly to the offending user
- Devised a system for automated archival of data to support information lifecycle management policies

Education

B.S. in Computer Science – The Pennsylvania State University

University Park, PA · 2015 - 2019

Technical Skills

Languages - Python, Javascript, Go, Java, Groovy, C++, HTML/CSS, MySQL, Lua, Perl, Bash
Tools & Frameworks - Flask, React, Node.js, Git, Docker, Azure, Jenkins, Datadog, Linux, Jira
Certifications - SAFe 5.1 (Scaled Agile Framework), Design for Six Sigma (DFSS)

Projects

shortstack.app Python, Javascript, React, Flask, PostgreSQL, Redis

- Deployed a URL shortening service to demonstrate the fullstack development process

Connect 4 AI Python

- Wrote Connect 4 using Pygame with a scaling AI opponent based on the Minimax algorithm

Godot Video Game GDScript

- Developing a point-and-click adventure game in Godot inspired by Monkey Island and Grim Fandango
